SUMMARY

Full Stack Developer with 2+ years of **production experience** delivering **enterprise-grade** web apps at Sonata Software — migrating legacy CRMs to **Angular 16 (90% performance gain)** and building **React 18** frontends from Figma to production. Dual expertise in **.NET 8** backend and modern frontend ecosystems, with hands-on experience in **microservices**, **JWT auth**, and **AI-assisted** development.

CORE EXPERTISE

- **Frontend:** Angular 16+, React 18, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Kendo UI, RxJS(Observables), Async/Await
- **Backend:** ASP.NET CORE (.NET 8), ASP.NET WEB API, LINQ, Entity Framework Core, Dependency Injection, Middleware, Authentication (JWT, Basic), Authorization (RBAC), OOPS, SOLID
- **Architecture:** Monolithic, Microservices
- **Database:** MSSQL, PostgreSQL
- **DevOps & Cloud:** Docker, CI/CD, Azure Fundamentals (AZ-900)
- **Management & Tools:** Agile, SDLC, Scrum, Jira, Git, Swagger, Postman, GitHub Copilot

EXPERIENCE

Software Developer

Sonata Software | March 2024–Present

PROJECT: Service CRM Modernization

CLIENT: Epicor

- **Architected and migrated** a legacy Perl-based application to a high-performance **Angular 16** ecosystem, achieving a **90% reduction in page load times**.
- **Engineered two data-intensive applications** using Kendo UI, delivering **real-time dashboards** that transformed complex datasets into actionable business intelligence.
- **Optimized system** throughput by implementing strategic **API feedback loops**, **lazy loading**, and custom loaders, maintaining a **seamless UX** during massive data processing.
- **Championed AI-driven development** by integrating **automated coding tools** into the team workflow, accelerating sprint delivery and ensuring **standardized code quality**.
- **Promoted global accessibility** by enforcing font accessibility standards across all flagship applications.
- Collaborated cross-functionally with backend developers and QA engineers to **troubleshoot** and resolve **performance bottlenecks and bugs**.
- Engineered **robust authentication workflows** and intelligent error-handling logic, leading to **100% successful** client user adoption.

PROJECT: GMT Digital Transformation

CLIENT: GMT(Green Mountain)

- Designed and **developed RESTful APIs** using ASP.NET Core within a **microservices-based environment**
- Implemented **JWT-based authentication** and authorization for secure API access
- **Enhanced API performance** by introducing **server-side pagination** for efficient handling of large datasets
- Applied **design patterns** and **clean code principles** to ensure maintainable and scalable architecture
- **Engineered a high-performance web application** from the ground up using React 18, **successfully translating high-fidelity Figma designs into a scalable**, production-ready frontend.
- Developed a modular component library using React 18 and Tailwind CSS, ensuring **100% design fidelity** and

consistent UI/UX across the entire application.

- Implemented optimized **state management** and data fetching patterns, **ensuring seamless integration** with .NET 8 APIs and real-time data responsiveness.
- Standardized frontend architecture by **implementing reusable React components** and hooks, reducing code redundancy across the project by 30%.
- Operated within an **Agile/Scrum framework**, delivering production-ready features in **2-week sprints** and **leading bi-weekly client demonstrations** to gather feedback and ensure alignment with business goals.

Frontend Developer Intern

Varcons Technologies | March 2023–August 2023

- Designed and developed a **responsive static Cafe website** template using Figma, HTML5, Bootstrap and CSS3, focusing on **modern UI/UX principles**.
- Bridged the gap between design and code by **translating high-fidelity Figma wireframes** into clean, semantic code to create visually appealing user interfaces.

PROJECT

E-Commerce Website | C#, ASP.NET Web API, LINQ, Entity Framework Core, Angular, MS SQL Server

- Developed a **full-stack e-commerce platform** featuring robust modules for product inventory and cart management.
- Built a scalable **RESTful API** using ASP.NET to handle **CRUD operations** for products, users, and order history.
- Designed and **optimized MS SQL Server relational schemas**, implementing **LINQ queries** to ensure high performance data retrieval and transaction integrity.
- **Integrated Angular frontend** with the Web API using **HTTP Interceptors** and Services for secure and smooth data flow.

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)** · Microsoft
- **Gen AI Mastermind**

Education

Bachelor of Technology: Computer Science and Engineering | Global Academy of Technology, Bangalore, Karnataka, India | **SGPA 9.04**
